

---

Abitibi Géophysique Inc. operates in the field of applied geophysics for mining exploration. Our expertise covers both the prospecting of precious and base metals, as well as diamond and uranium. Based in Val-d'Or, the company conducts surveys primarily in Canada, but also at an international level.

The geophysicist ensures technical supervision of field teams, the quality of collected data, the production of the final report, and overall client satisfaction with the delivered product.

---

We are looking for a:

### Field Project Geophysicist

Description:

- Verify and control, quality control of geophysical data and required corrections of field procedures if needed;
- Take the initiative of communicating with the client, especially with the geophysical objectives of the survey or consultation;
- Collect and process all geophysical data of interpretation and carry out the interpretation;
- Conduct a review of the concept of interpretation of geophysical surveys with the technical director;
- Interpret results and write a report in accordance with client expectations and internal standards;
- Ensure the control of the technical aspects, the efficiency of the procedure, the quality of the results and the compliance with customer requirements;
- Submit to the CEO its requirements for the production of the final report to ensure timely delivery to the customer;
- Ensure the production of the final report and the customer's satisfaction with the product delivered;
- Check each component of the final report before authorizing reproduction and signatures;

Requirements:

- B.Sc. in Geophysics/Geology or Physics;
- Experience in mineral exploration;
- Knowledge of software like Geosoft Montaj and Maxwell;
- Qualifications to become a member of OIQ, OGQ, PEGNL, APGO, or similar professional organization.

We are offering:

- We will try to have you work on all types of surveys we are offering;
- Highly competitive salary;
- Competitive benefits;
- Marvellous work environment in our brand-new office;
- Friendly and supportive working conditions.
