
Do you feel the call of nature? We are looking for geophysical **laborers** in excellent physical shape. Join a young and energetic team, passionate about outdoor work and mineral exploration.

The region of Val-d'Or is the kingdom of mines and drilling. It is therefore natural that Abitibi Geophysics chose this region to settle in 2001. Since then, the company has developed **cutting-edge expertise** in its field.

Maneuver in geophysics

As a **Laborer** for Abitibi Geophysics, you will venture into the forests everywhere across Canada and even internationally to carry out geophysical projects for mineral exploration.

Here is what a standard contract looks like:

- You leave together with all the necessary equipment towards your destination, for a contract with a duration of 2 to 5 weeks.
- You are housed and fed for the duration of the project.
- You assist your team leader and operator in the preparation of support material for geophysical surveys.
- You transport and install the equipment in a forest environment.
- You use the vehicles respecting safety standards; '
- You report to your team leader the conditions on the ground that could affect the smooth running of the project.
- In the evening, you take advantage of this rest time to share a good meal with your teammates before starting again the next day!

To join our team, you must:

- Hold a class 5 driver's license.
- Be able to work in the forest environment.
- Have excellent physical endurance.
- Be willing to make 2 to 6-week contracts outside the city.
- Have experience in driving a truck, trailer, ATV, snowmobile and motorboat.

You are:

- A good teammate.
- An independent person capable of taking initiatives.
- A robust and resistant worker.
